

Microsoft Windows Server 2008:

ADVENTURES IN VIRTUALIZATION

Course Objectives:

Today's powerful x64 bit computer hardware was originally designed to run only a single operating system and a single application, but virtualization breaks that bond, making it possible to run multiple operating systems and multiple applications on the same computer at the same time, increasing the utilization and flexibility of hardware.

The latest release of Windows server 2008 represents the next generation of Server platform and a major investment for Microsoft. As a product, Server 2008 contains more cool features than your average James Bond movie. "Q" would be proud! One of the "must have's" of 2008 is Virtualization. From Hyper-V to Terminal Services. Virtualization is expanding into new areas and changing our world.

This exclusive and intensive 2 day event is designed for experienced users of the Windows Server platform and aims to give a clear understanding on what virtualization is and more importantly what it can do. From Machine, Presentation and Application Virtualization we dive deeper into new and anticipated technologies. Previous knowledge or skills would be useful.

Date:	TBC
Duration:	2 days from 9.30am to 4.00pm
Venue:	TBC
Audience:	Early Adopters, IT Professionals with experience of the Windows Server Platform who are looking to gain insight in to future developments.
Price:	£TBC.
Format:	Technical Seminar

Course Outline:

- Introductions
- Introducing Hyper-V
- Microsoft Windows Server 2008 Hyper-V Vs VMware
- Moving from the physical world to the virtual world!
- Deploying, Managing & Servicing Virtual Machine Images
- Managing Virtualization with Virtual Machine Manager 2008
- Desktop Virtualization – Managing Remote Desktops
- Application Virtualization – Terminal Services 2008
- Deploying & Managing Applications with Terminal Remote Programs
- Accessing Applications via TS Gateway
- Configuring TS Web Access
- Conclusions & Q&A Session

The Presenter: Andy Malone Microsoft MVP, MCT

Andy Malone is the Managing Director of Quality Training Ltd. Based in Scotland, Andy is a motivated technical trainer, Microsoft speaker, and technology evangelist with over 14 years experience in IT training and consultancy. Andy was also the 2006 winner of the TechEd: IT Forum Speaker Idol contest.

Having been a Microsoft Certified Trainer since 1994, Andy brings a wealth of real-world experience to his courses and teaches to a consistently high standard. His knowledge stems from early editions of Windows NT, Exchange, and the Office platforms to Windows Vista, Windows Server 2008 and beyond.

Andy's recent speaker engagements include TechEd IT Forum 07, The MCT Summits in Berlin and Zurich, IT Pro Connections Amsterdam. Dive Deeper – Security Summit 08 in Iceland. During 2007/08 Andy has delivered content to over 7000 delegates in 21 cities worldwide, For 2008 Andy is scheduled to deliver content in the US, Europe and the Middle East to name but a few.
