

Microsoft Windows Server 2008: The Terminal Server 2008 MasterClass

Course Objectives:

In the IT Business we all see ourselves as action heroes. In an ever changing world even Indiana Jones has to keep up. This informative 1 day event will show you how to successfully deploy and manage terminal Server for Windows Server 2008. With its amazing array of new features, terminal services can revolutionise your business.

From planning to production this event will help you get the most out of your investment whilst avoiding the pitfalls. Areas that will be covered include deploying terminal server remote applications via Active Directory, managing TS Web access and ensuring maximum network performance using the TS Session Broker service. We also look at the pitfalls of deployment and how to avoid them.

The latest release of Windows server 2008 represents the next generation of Server platform and a major investment for Microsoft. As a product, Server 2008 contains more action than the latest Indiana Jones movie. "Mr Lucas" would be proud!

This exclusive and intensive 1 day hands on event is designed for experienced users of the Windows Server platform and aims to give a clear understanding on what Terminal Services is and more importantly what it can do. Join us as we dive deeper into new and anticipated technologies. Previous knowledge or skills would be useful.

Date: TBC

Duration: 1 day from 9.30am to 4.00pm

Format: Lecture & Hands on Labs

Audience: Early Adopters, IT Professionals with experience of the Windows Server Platform who are looking to gain insight in to future developments.
