

Dive Deeper™

Windows Server 2008 R2 MasterClass

Seminar Objectives:

With the RC release of Windows 7 now available, Microsoft have been keen to promote its big brother, Windows Server 2008 R2. So what are the new shiny bits and why should you care! Well for one thing Windows Server 2008 has been very successful for Microsoft and has enjoyed a positive reception unlike the over bloated Vista. Server 2008 is set to debut in 2009, but expect a lot of noise on the subject from the boys in Redmond

This exciting hands on MasterClass is ideal for IT Professionals who want to gain early skills and knowledge in order to be able to plan, deploy and manage Windows Server 2008 R2. This unique course will introduce many new and improved features and will understand on what's new and more importantly what these new features mean to your business. So join us as we dive deeper into new and anticipated technologies.

Duration: 1 Day.

Audience: Early Adopters, IT Professionals with experience of the Windows Server Platform who are looking to gain insight in to future developments.

- Conclusions & Q&A Session

The Instructor: Andy Malone Microsoft MVP, MCT

Andy Malone is the CEO of Quality Training Ltd and founder of both the Dive Deeper Technology and Cybercrime Security events. Based in Scotland, Andy is a popular international event speaker and technology evangelist with over 15 years experience. Andy was also the 2006 winner of the Microsoft TechEd Speaker Idol contest. Andy has delivered technical and security content to thousands of delegates worldwide at various technical conferences, such as Microsoft TechEd, IT Pro-Connections and Tech-days. His passionate style of delivery, combined with a sense of fun has become his trademark.

Although his primary focus is for security. Andy loves to talk about the Windows platform, Exchange and Office technologies. And with knowledge dating back to the MS-DOS 2 and Windows 2.0 era there is often an interesting story to be told. But technology never sleeps and Andy continues to work with the Microsoft product teams to create and deliver ground breaking material on Windows 7, Server 2008 R2 and beyond. For 2009/10 Andy is scheduled to deliver content in Europe, the Middle East, Russia and the US to name but a few. Andy's blog: <http://blogs.quality-training.co.uk/blog>
